5. Some members expressed the concern that the procedures for using the NOIWON network should be reviewed and updated where required to ensure that all subscribers were operating from the same set of instructions. This would help in reducing the misuse of the system that was designed for informal, nonrecord, secure voice communications among the Washington area operations centers. This issue will be researched and presented at a subsequent WAOC meeting.

6. The meeting concluded with a guided tour of the newly refurbished CIA Operations Center. Scheduling of the next meeting will be disseminated separately.
